

Instructions for recreating microSD card for IBU2U

Note if using MicroSD card not supplied with IBU2U it must be Class 6 or high for optimum performance with IBU2U.

1. Erase MicroSD card.
2. Download “microsd.zip”
<https://www.rctankelectronics.com/uploads/2/4/7/1/24711568/microsd.zip>
3. Find where the “microsd.zip” is saved (normally “download” folder), right click on it and extract.

4. Once extracted open “microSD” folder. And Copy all files and folders.

5. Paste onto MicroSD card.

You now have the basic as shipped MicroSD card which will work and provide Tiger I sounds.

Note

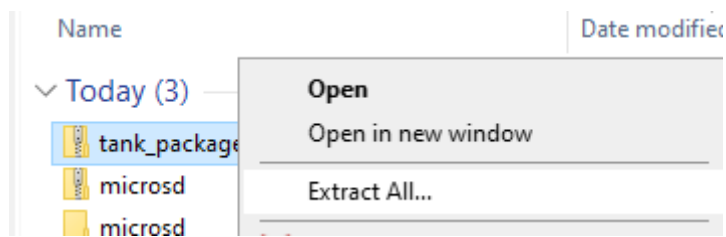

The “Boarddata” file will self generate when put into the IBU2U and powered on.

The “Tank Packages” folder is currently empty.

To add additional tank packages.

6. Download “tank_packages_1.zip”
https://www.rctankelectronics.com/uploads/2/4/7/1/24711568/tank_packages_1.zip

- Find where the “tank_package_1.zip” is saved (normally “download” folder), right click on it and extract.

- Once extracted open “tank_package_1” folder. Copy all the folders.

- Paste into the “Tanks Audio Packages” folder of the MicroSD card.
- Do the same for process for “tank_packages_2.zip”
https://www.rctankelectronics.com/uploads/2/4/7/1/24711568/tank_packages_2.zip
And “tank_packages_3.zip”
https://www.rctankelectronics.com/uploads/2/4/7/1/24711568/tank_packages_3.zip

You now have a complete MicroSD card.
